

Software Requirements Specification (SRS)

SECTION 1: INTRODUCTION AND SCOPE

- 1.1 The E-Commerce Web Platform enables registered consumers to browse catalogs, manage wishlists, place online orders, and configure personal profile information.
- 1.2 All authenticated interactions must comply with standard security and encryption protocols.

SECTION 2: USER PROFILE & IDENTITY MANAGEMENT

- 2.1 Users can update their registered email address from their account settings.
- 2.2 Users must be able to reset their password using their registered email.
- 2.3 Users must be automatically logged out after 15 minutes of inactivity to protect sensitive financial sessions.
- 2.4 Two-factor authentication (2FA) via SMS or authenticator app must be strictly mandatory for administrator access.

SECTION 3: ORDER PROCESSING & FULFILLMENT

- 3.1 Customer can cancel an order before shipment directly through the customer order history dashboard.
- 3.2 The system shall issue a full refund within 14 days of delivery upon receipt and inspection of returned merchandise.
- 3.3 Customers may view order tracking milestones in real time.

SECTION 4: SYSTEM PERFORMANCE & ADMINISTRATION

- 4.1 The system must respond quickly during high traffic periods to ensure a seamless checkout experience.
- 4.2 Administrators must have access to real-time sales reporting and inventory audit logs.
- 4.3 Customer support representatives may view customer transaction history for troubleshooting purposes.
